PUBLICATIONS: Professor Y.M. SUHOV (I.M. SOUKHOV)

1. One-parameter semigroup generated by a Gibbs distribution. *Uspekhi Matem. Nauk* (Russian) **25**, No 1 (1970), 199–200.
2. An application of the matrix method for continuous systems of classical statistical mechanics. *Uspekhi Matem. Nauk* (Russian) **25**, No 2 (1970), 277–278.
3. The limit density matrices for one-dimensional continuous systems of quantum statistical mechanics. *Matem. Sborn.* (Russian) **83**, No 4 (1970), 491–512.
4. The existence and regularity of the limit Gibbs state for one-dimensional continuous systems of quantum statistical mechanics. *Doklady AN SSSR* (Russian), **195**, No 5 (1970, 1042–1045.
5. The free Gibbs energy for one-dimensional continuous quantum systems. *Teoret. Matem. Fizika* (Russian), **10**, No 1, (1970), 113–121.
6. A review of some new results. Appendix to the Russian translation of *Statistical Mechanics: Rigorous Results* (D. Ruelle). New York: Benjamin (1969); Russian edition: Mir, Moscow (1971), pp 314–361.
7. *The Matrix Method for One-dimensional Continuous Systems of Quantum Statistical Mechanics.* Candidate Dissertation (Russian), Moscow State University, Lomonossov (1971).
8. The matrix method for continuous systems of statistical mechanics. *Trudy Mosc. Matem. Ob.* (Russian), **24** (1971), 175–200.
9. Regularity of the limit density matrices for one-dimensional continuous quantum systems. *Trudy Mosc. Matem. Ob.* (Russian), **26** (1972), 152–179.
10. On one-dimensional continuous quantum systems without hard core. *Uspekhi Matem. Nauk* (Russian), **28**, No 1 (1973), 253–254.
11. On invariant measures for dynamical systems of one-dimensional statistical mechanics (with B.M. Gurevich and Ya.G. Sinai). *Uspekhi Matem. Nauk* (Russian), **28**, No 5 (1973), 45–77.
12. Asymptotical analysis of star-like message switching networks (with R.L. Dobrushin). *Proc. VII Int. Teletraffic Congress*, Stockholm, 1973, pp 343/1–3.
13. Sur les systemes continus de la mechanique statistique quantique a une dimension avec une interaction de partee infinie. *Comptes Rendus Acad. Sci. Paris* **279**, Ser.A (1974), 433–434.
14. Absence de transition de phases dans les systemes continus de la mechanique statistique quantique a une dimension. *Comptes Rendus Acad. Sci. Paris* **279**, Ser.A (1974), 475–477.

15. On a theorem of existence of a solution to the Bogoljubov hierarchy (with Ya.G. Sinai). *Teoret. Matem. Fizika* (Russian), **19**, No 3 (1974), 344–363.
16. Stationary solutions of the Bogoljubov hierarchy equations in classical statistical mechanics (with B.M. Gurevich). *Doklady AN SSSR* (Russian), **223**, No 2 (1975), 276–279.
17. Invariant measures for Hamiltonian systems of infinitely many degrees of freedom and stationary solutions of the Bogoljubov hierarchy equations (with B.M. Gurevich). *Uspekhi Matem. Nauk* (Russian), **30**, No 6 (1975), 199–200.
18. Asymptotical analysis of star-like message switching networks with a large number of radial rays (with R.L. Dobrushin). *Problems Inform. Transmission*, **12**, No 1 (1976), 79–94.
19. Stationary solutions of the Bogoljubov hierarchy equations in classical statistical mechanics, 1 (with B.M. Gurevich). *Commun. Math. Phys.* **49** (1976), 69–96.
20. Random point processes and DLR equations. *Commun. Math. Phys.* **50** (1976), 113–131.
21. Stationary solutions of the Bogoljubov hierarchy equations in classical statistical mechanics, 2 (with B.M. Gurevich). *Commun. Math. Phys.* **54** (1977), 81–96.
22. Stationary solutions of the Bogoljubov hierarchy equations in classical statistical mechanics, 3 (with B.M. Gurevich). *Commun. Math. Phys.* **56** (1977), 225–236.
23. On the problem of the mathematical foundation of the Gibbs postulate in classical statistical mechanics (with R.L. Dobrushin). *Lecture Notes in Physics* **80** (1978), 325–340.
24. Time evolution of Gibbs states in one-dimensional classical statistical mechanics (with B.M. Gurevich). *Doklady AN SSR* (Russian) **242**, No 2 (1978), 276–279.
25. On the problem of the Gibbs description of random processes with the discrete time (with Yu.R. Dashjan). *Doklady AN SSR* (Russian) **242**, No 3 (1978), 513–516.
26. Limit Gibbs states for some classes of one-dimensional systems of quantum statistical mechanics. *Commun. Math. Phys.* **62**, (1978), 119–136.
27. The strong solution to the Bogoljubov hierarchy equations in one-dimensional classical statistical mechanics. *Doklady AN SSR* (Russian) **244**, No 5 (1979), 1081–1084.
28. On some problems in the information theory and related areas (with V.I. Siforov and V.A. Zinovjev). *Problems of Control and Information Theory* **7**, No 6 (1979), 407–428.
29. Time asymptotics for some degenerate models of evolution of infinite particle systems (with C. Boldrighini and R.L. Dobrushin). *Sovremennye Problemy Matematiki*, VINITI AN SSSR (Russian) **14** (1979), 147–254.
30. Time evolution of a Gibbs state of an anharmonic lattice (with C. Marchioro, A. Pellegrinotti and M. Pulvirenti). *Commun. Math. Phys.* **66** (1979), 131–146.

30. On a class of star-like packet-switching networks (with M.Ya. Kelbert). *Problems Inform. Transmission* **15**, No 5 (1979), 53–72.

31. Hydrodynamic limit for a degenerate model of classical statistical mechanics (with C. Boldrighini and R.L. Dobrushin). *Uspekhi Matem. Nauk* (Russian), **35**, No 4 (1980), 152.

32. Hydrodynamics of one-dimensional hard rods (with C. Boldrighini and R.L. Dobrushin). *Uspekhi Matem. Nauk* **35**, No 5 (1980), 252–253.

33. Stationary solutions of the Bogoljubov hierarchy equations in classical statistical mechanics, 4 (with B.M. Gurevich). *Commun. Math. Phys.* **84** (1982), 333–376.

34. Summatory integrals of the motion of particles with pair interaction (with B.M. Gurevich). *Uspekhi Matem. Nauk* (Russian) **36**, No 4 (1982), 218.

35. Convergence to a Poisson distribution for some models of the motion of particles. *Izvestija AN SSSR*, ser. mat. (Russian) **46**, No 1 (1982), 135–153.

36. Convergence to an equilibrium state for a one-dimensional continuous quantum system of hard rods. *Izvestija AN SSSR, ser. mat.* (Russian) **46**, No 6 (1982), 1274–1315.

37. Conditions for existence and uniqueness of a full random field describing a state of a communication network (with M.Ya. Kelbert). *Problems Inform. Transmission* **19**, No 4 (1983), 50–71.

38. One-dimensional hard rod caricature of hydrodynamics (with C. Boldrighini and R.L. Dobrushin). *J. Stat. Phys.* **31**, No 3, (1983), 577–616.

39. Stationary solutions of the Bogoljubov hierarchy equations and first integrals of the motion: one-dimensional case. *Teoret. Matem. Fizika* (Russian) **55**, No 1 (1983), 78–88.

40. Convergence to an equilibrium for the free Fermi-gas. *Teoret. Matem. Fizika* (Russian) **55**, No 2 (1983), 282–290.

41. *Probabilistic Methods in the Problem of Convergence to an Equilibrium Gibbs State* (Russian). Doctorate thesis, Vilnjus State University (1984).

42. Linear bosonic models of time evolution in quantum statistical mechanics. *Izvestija AN SSSR*, ser. mat. (Russian) **48**, No 1 (1984), 155–191.

43. Weak dependence properties of the random field describing a state of a communication network under small transient flows (with M.Ya. Kelbert). *Problems Inform. Transmission* **21**, No 3, (1985), 89–98.

44. One-dimensional harmonic lattice caricature of hydrodynamics (with R.L. Dobrush in, A. Pellegrinotti and L. Triolo). *J. Stat. Phys.* **38**, No 4 (1985), 473–507.

45. Convergence to a limiting state for groups of linear canonical transformations of C^*-algebras of canonical commutation relations (with A.B. Shukhov). *Doklady AN SSSR* (Russian) **284**, No 5, (1985), 1076–1079.

46. On the hydrodynamical approximation for groups of linear canonical transformations of CAR C^*-algebras (with A.B. Shukhov). *Doklady AN SSSR* (Russian) **291**, No 1, 1986), 556–559.

47. Dynamical systems of statistical mechanics (with R.L. Dobrushin and Ya.B. Sinai). In *Dinamicheskie Sistemy, 2: Sovremennye Problemy Matematiki* (Russian), Fundamentalnyje Napravlenija, VINITI AN SSSR, **2** (1985), 233–307.

48. Linear and related models of time evolution in quantum statistical mechanics (with A.B. Shukhov). In *Statistical Physics and Dynamical Systems: Rigorous Results*, Birkhauser: Boston (1985), 83–104.

49. A one-dimensional XY-model: Ergodic properties and hydrodynamic approximation (with A. Shukhov). *J. Stat. Phys.* **45**, No 3/4, (1986), 669–694.

50. Ergodic properties of groups of the Bogoljubov transformations of CAR C^*-algebras (with A.G. Shukhov). *Ann. Phys.* **175**, (1987), 231–266.

51. Convergence to a stationary state for one-dimensional lattice quantum models of hard rods (with A.G. Shukhov). *Teoret. Matem. Fizika* (Russian) **73**, No 1 (1987), 125–140.

52. Hybrid switching networks on one-dimensional lattice (with R.N. Shamsijev). *Problems Inform. Transmission* **23**, No 4 (1987), 75–86.

53. Hydrodynamic approximation for groups of the Bogoljubov transformations in quantum statistical mechanics (with A.G. Shukhov). *Trudy Mosc. Matem. Ob.* **50** (1987), 156–208.

54. One-dimensional harmonic lattice caricature of hydrodynamics: The second approximation (with R.L. Dobrushin, A. Pellegrinotti and L. Triolo). *J. Stat. Phys.* **52**, No 1/2, (1987), 423–439.

55. Mathematical problems in the theory of queueing networks (with M.Ya. Kelbert). In *Teorija Verojatnosteji. Matematicheskaja Statistica, Teoreticheskaja Kibernetika*, VINITI AN SSSR (Russian) **26** (1988), 3–96.

56. Remarks on asymptotic properties of groups of Bogoljubov transformations of CAR C^*-algebras (with A.G. Shukhov). *Lecture Notes in Mathematics* **1303** (1988), 329–342.

57. A.N. Kolmogorov, the foundator of the theory of reversible Markov processes (with R.L. Dobrushin and J. Fritz). *Uspekhi Matem. Nauk* (Russian) **43**, No 6 (1988), 167–188.

58. Poissonian limit theorem for hybrid star-like switching networks: A mean-field approximation (with M.Ya. Kelbert). *Problems Inform. Transmission* **25**, No 1 (1989), 78–89.

59. Statistical mechanics of complex queueing networks. *Proc. IX Int. Congress on Mathematical Physics*, Swansea, 1988. Adam Higler: Bristol, New York (1989), 388–391.

60. Circuit-switching networks with FIFO plus justifying blockout service on infinite graphs (with M.Ya. Kelbert). *Queueing Systems* **4** (1989), 157–170.

61. Perturbation theory approach for a class of hybrid switching networks with small transit flows (with M.Ya. Kelbert, R.P. Kopeika and R.N. Shamsiev). *Adv. Appl. Prob.* **22**, No 1 (1990), 211–229.

62. On a class of packet-switching networks on infinite graphs (with M.Ya. Kelbert). *Queueing Systems* **5** (1990).

63. Qualitative theory of queueing networks (with R.L. Dobrushin, M.Ya. Kelbert and A.N. Rybko). In *Stochastic Cellular Systems: Ergodicity, Memory, Morphogenesis* (Non-Linear Science: Theory and Applications) (eds. R.L. Dobrushin, V.I. Kryukov and A.L. Toom). Chichester: Wiley (1992).

64. Non-linear law of large numbers and queueing theory (with M.Ya. Kelbert). *Proc. 5th Vilnjus Conf. on Probability Theory and Mathematical Statistics*, Vilnjus, 1989. Springer-Verlag: Berlin, (1990).

65. Asymptotical properties of groups of Bogoljubov transformations (with A.G. Shuk hov). *Quantum Probability, 5, Lecture Notes in Mathematics* **1442**. Springer-Verlag: Berlin, (1990), 384–392.

66. One-dimensional harmonic lattice caricature of hydrodynamics: The higher correction (with R.L. Dobrushin and A. Pellegrinotti). *J. Stat. Phys.* **61**, No 1/2 (1990), 387–402.

67. One-dimensional hard-rod caricature of hydrodynamics: The Navier-Stokes correction (with R.L. Dobrushin and C. Boldrighini). DIAS STP 90–33, Dublin Institute for Advanced Studies (1990). Preprint.

68. Stabilization of the statistical solution for a class of parabolic differential equations (with N.E. Ratanov and A.G. Shukhov). *Acta Applicandae Mathematicae* **22**, No 1 (1991), 103–116.

69. An existence theorem for a solution of the Bogoljubov hierarchy for one-dimensional bosonic lattice systems in quantum statistical mechanics (with A.G. Shukhov). *Doklady AN SSSR* (Russian), **316**, No 3 (1991), 586–589.

70. Invariant states for time-dynamics of one-dimensional lattice Fermi-systems (with N.E. Ratanov). *Teoret. Matem. Fizika* (Russian), **88**, No 2 (1991), 247–259.

71. Random surfaces with two-sided constraints: An application of the theory of dominant ground states (with A.E. Mazel). *J. Stat. Phys.*, **64**, No 1/2 (1991), 111–134.

72. Towards the construction of time-dynamics for bosonic systems of quantum statistical mechanics, 1 (with A.G. Shukhov and A.V. Teslenko). In: *Ideas and Methods in Mathematical Analysis, Stochastics and Applications. In Memory of R. Hoegh-Krohn.* (eds. S. Albeverio, J.E. Fenstad, H. Holden and J.E. Lindstrom). Vol II, 512–532. Cambridge University Press, 1992.

73. Towards the construction of time-dynamics for bosonic systems of quantum statistical mechanics, 2 (with A.G. Shukhov). In: *Ideas and Methods in Mathematical Analysis, Stochastics and Applications. In Memory of R. Hoegh-Krohn.* (ed. S. Albeverio, J.E. Fenstad, H. Holden and J.E. Lindstrom). Vol II, 533–548. Cambridge University Press, 1992.

74. The mean-field limit for a class of queueing networks (with F. Baccelli, F.I. Karpelevich, M.Ya. Kelbert, A.A. Pukhalskii and A.N. Rybko). *J. Stat. Phys.* **66**, No 3/4 (1992), 802–825.

75. Ergodic systems of n balls in a billiard table (with L. Bunimovich, C. Liverani and A. Pellegrinotti). *Commun. Math. Phys.* **146**, No 2 (1992), 357–396.

76 On the Gibbs states for one-dimensional lattice boson systems with a long-range interaction (with E. Olivieri and P. Picco). *J. Stat. Phys.*, **70**, No 3/4 (1993), 985–1028.

77. On invariant states for time-dynamics for a class of lattice quantum Fermi-systems (with N.E. Ratanov). *Teoret. Matem. Fizika* (Russian), **94**, No 1 (1993), 76–83.

78. The branching diffusion, stochastic equations and travelling wave solutions to the equation of Kolmogorov–Petrovskii–Piskunov (with F.I. Karpelevich and M.Ya. Kelbert). In: *Cellular Automata and Cooperative Systems* (eds E. Boccara, R. Goles, S. Martinez and P. Picco). Kluwer: Dordrecht, 1993, pp 343–366.

79. Stochastic equations on random trees (with F.I. Karpelevich and M.Ya. Kelbert). In: *Cellular Automata and Cooperative Behaviour* (eds E. Boccara, R. Goles, S. Martinez and P. Picco). Kluwer: Dordrecht, 1993, pp 323–342.

80. On the Gibbs states for one-dimensional lattice boson systems with a long-range interaction (with E. Olivieri and P. Picco). In: *Cellular Automata and Cooperative Behaviour* (eds E. Boccara, R. Goles, S. Martinez and P. Picco). Kluwer: Dordrecht, 1993, pp 531–539.

81. Higher-order Lindley equations (with F.I. Karpelevich and M.Ya. Kelbert). *Stoch. Processes Appl.*, **53** (1994), 65–96

82. Prefixes and the entropy rate for long-range, finite-valued processes (with I. Kontoyiannis). In: *Probability, Statistics and Optimization.* A tribute to P. Whittle (ed F.P. Kelly,). Chichester: Wiley, 1994, pp 89–98

83. The boundedness of branching Markov processes (with F.I. Karpelevich and M.Ya. Kelbert). In: *The Dynkin Festschrift. Markov Processes and Their Applications* (ed M. Freidlin). Progress in Probability, Vol.34, Boston: Birkhäuser, 1994, pp 143-153

84. The Markov branching random walk and systems of reaction-diffusion (Kolmogorov–Petrovskii–Piskunov) equations (with M.Ya. Kelbert). *Commun. Math. Phys.*, **167**, No 3 (1995), 607–634

85. The limiting departure flow in an infinite series of queues (with N.D. Vvedenskaya). *Problems Inform. Transmission*, **31**, No 3 (1995), 125–134.

86. Ground states of quantum hard-core systems (with A. Mazel). In: *Sinai's Moscow Seminar on Dynamical Systems* (eds L.A. Bunimovich, B.M. Gurevich and Ya.B. Pesin). Advances in Mathematical Science – 28 (formerly Advances in Soviet Mathematics. Translations of American Mathematical Society), Series 2, Vol.171. Providence: American Mathematical Society, 1995, pp 185–226.

87. Starlike networks with synchronization constraints (with S.A. Berezner and D. Rose). In *Stochastic Networks* (eds F.P. Kelly and R.J. Williams). IMA Volumes in Mathematics and its Applications, Vol.71. Springer-Verlag: New York, 1995, pp 313–333.

88. Professor Roland Dobrushin. *The Independent*, 29 November 1995.

89. In memory of Roland L'vovich Dobrushin (with L.A. Bassalygo, V.A. Malyshev, R.A. Minlos, I.A. Ovseevich, M.S. Pinsker, V.V. Prelov, A.N. Rybko and S.B. Shlosman). *Problems Inform. Transmission*, **32**, No 2 (1996), 3–24.

90. A Branching Diffusion approximation for a class of queueing networks (with N. Duffield and M. Kelbert). In: *Stochastic Analysis and Applications. Proc. Fifth Gregynog Symp. Gregynog, Powis, UK, 9–14 July 1995* (eds I.M. Davies, A. Truman and K.D. Elworthy). Singapore: World Scientific, 1996, pp 201–220.

91. An Ising interface between two walls: competition between two tendencies (with J.L. Lebowitz and A.E. Mazel). *Reviews in Mathematical Physics*, **8**, No 5 (1996), 669-687.

92. The Poisson-independence hypothesis for infinitely-growing fully-connected packet-switching networks (with D. Rose). In: *Stochastic Networks. Theory and Applications* (eds F.P. Kelly, S. Zachary and I. Ziedins). Clarendon Press: Oxford, 1996, pp 323–338.

93. Remarks on the life and research of Roland L. Dobrushin (with R.A. Minlos and E.A. Pechersky). *J. Appl. Math. Stoch. Anal.*, **9**, No 4 (1996), 337-372.

94. Dobrushin's approach to queueing network theory (with F.I. Karpelevich and E.A. Pechersky). *J. Appl. Math. Stoch. Anal.*, **9**, No 4 (1996), 373-398.

95. The branching diffusion approximation for a model of synchronized queueing network (with N.G.Duffield and M.Kelbert). In: *Distributed Computer Communication Networks. Theory and Application* (eds. V.M.Vishnevsky and V.V.Rykov). Proc. of the International DCCN Conference, Tel-Aviv, 4–8 Nov., 1996. Institute for Information Transmission Problems: Moscow, 1996, 32–38.

96. The Poisson-independence hypothesis: early development and some recent results (with D.M.Rose and N.D.Vvedenskaya). In: *Distributed Computer Communication Networks. Theory and Application* (eds. V.M.Vishnevsky and V.V.Rykov). Proc. of the International DCCN Conference, Tel-Aviv, 4–8 Nov., 1996. Institute for Information Transmission Problems: Moscow, 1996, 67–76.

97. Boris Vladimirovich Gnedenko (with D.G.Kendall). *Bernoulli*, **3** (1997), 1–2.

98. Boris Gnedenko. *J. R. Stat. Soc.*, Ser. A, **160**, (1997), 363–366.

99. A criterion of boundedness of discrete branching random walk (with F.I. Karpelevich). In: *Classical and Modern Branching Processes* (eds K.B. Athreya and P. Jagers). IMA Volumes in Mathematics and its Applications, Vol.84. Springer-Verlag: New York, 1997, pp 141-156.

100. Dobrushin's ideas in the theory of queueing networks (with E.A. Pechersky). *Russian Math. Surveys,* **52** (1997), No 2, 265–270.

101. One-dimensional hard-rod caricature of hydrodynamics: "Navier-Stokes correction" for locally-equilibrium initial states (with C. Boldrighini). *Commun. Math. Phys.*, **189** (1997), 577–590.

102. Boundedness of one-dimensional branching Markov processes. (with F.I. Karpelevich) *J. Appl. Math. Stoch. Anal.*, **10**, No 4 (1997), 307–342.

103. The branching diffusion approximation for a model of synchronized queueing network (with N.G.Duffield and M.Kelbert). In: *The Liptser Festschrift. Statistics and Control of Stochastic Processes.* Steklov Mathematical Institute, Russian AS, 1995-1996. (Yu.M.Kabanov, B.L.Rozovsky and A.N.Shiryaev, eds). Singapore: World Scientific, 1997, pp. 13–40.

104. Dobrushin's mean-field approximation for a queue with dynamic routing (with N.D. Vvedenskaya). *Markov Processes and Related Fields*, **3**, No 4 (1997), 493–526.

105. The entropy of famous reals: some empirical results (with W.Bradley). *Random Comput. Dynam.*, **5**, no 4 (1997), 349 – 359.

106. Polygonal billiards with point obstacles (by P. Hiemer and V. Snurnikov (the supervised work)). *J. Stat. Phys.,* **90** (1998), 453–466.

107. Nonparametric entropy estimation for stationary processes and random fields with applications to English text (with I. Kontoyiannis, P.H. Algoet and A.J. Wyner). *IEEE Trans. Inform. Theory*, **44** (1998), 1319 - 1327.

108. A.N. Kolmogorov. In: *Encyclopedia of Biostatistics*, vol. **3**. Chichester: Wiley, 1998, pp. 2169 - 2172.

109. A phase transition for hyperbolic branching processes (with F.I. Karpelevich and E.A. Pechersky). *Commun. Math. Phys.,* **195** (1998), 627 - 642.

110. An optimal probabilistic routing policy for a large packet-switching network (with D.M. Rose and N.D. Vvedenskaya). *Communication in Statistics – Stochastic Models*, **14**, no. 5 (1998), 1027–1050.

111. Stationary solutions of non-autonomous Kolmogorov–Petrovsky–Piskunov equations (with V.A. Volpert). *Ergodic Theory Dyn. Systems*, **19** (1998), 809–835.

112. On the spectrum of the generator of an infinite system of interacting diffusions (with R.A. Minlos). *Commun. Math. Phys.,* **206** (1999), 463 - 490.

113. Fast Jackson networks (with J.B. Martin). *Annals of Applied Probability*, **9**, No 4 (1999), 854–870.

114. Statistics of Klein polyhedra and multi-dimensional continued fractions (with M. Kontsevich). *Pseudoperiodic Topology* (eds V. Arnol'd, M. Kontsevich and A. Zorich). Amer. Math. Transl. Ser. 2, vol. **197**. Providence, R.I.: American Mathematical Society, 1999, pp. 9–28.

115. Large deviations in some systems with queues (with E.A. Pecherski and N.D. Vvedenskaya) *Problems Inform. Transmission* **36**, No 2 (2000), 42–53.

116. (Edited book) *On Dobrushin's Way. From Probability Theory to Statistical Physics* (with R.A. Minlos and S. Shlosman). Translations of the AMS, Series 2, vol. **198**. Providence, R.I.: American Mathematical Society, 2000.

117. The Cramér transform and large deviations on the 3D Lobachevsky space (with F.I. Karpelevich and E.A. Pechersky). In: *On Dobrushin's way. From Probability Theory to Statistical Physics.* A volume in memory of R.L. Dobrushin (eds R.A. Minlos, S. Shlosman and Yu. M. Suhov). Translations of the AMS, Series 2, vol. **198**. Providence, R.I.: American Mathematical Society, 2000, 117–131.

118. *Dynamical Systems, Ergodic Theory and Applications* (with L.A. Bunimovich, S.G. Dani, R.L. Dobrushin, M.V. Jakobson, I.P. Kornfeld, N.B. Maslova, Ya.B. Pesin, Ya.G. Sinai, J. Smillie and A.M. Vershik), 2nd Edition. Berlin: Springer, 2000.

119. Entropy and convergence on compact groups (with O. Johnston). *Journ. Theor. Prob.*, **13** (2000), No 3, 843–857.

120. Quantum information theory and quantum computations (with M.Y. Kelbert). *Quantum Computers and Computing*, **1** (2001) No 2, 25–37.

121. An entropic measurement of queueing behaviour in a class of manufacturing operations (with G. Frizelle). *Proc. Royal Soc. Lond.*, Ser A, **457** (2001), 1579–1601.

122. Entropy and random vectors (with O. Johnson). *Journ. Stat. Phys.*, **104** (2001), Nos 1/2, 145–165.

123. Differential equations arising in queueing theory (with N.D. Vvedenskaya). *Functional Differential Equations*, **8** (2001), 447–457.

124. On convergence to equilibrium distribution, I. The Klein–Gordon equation with mixing (with T.E. Dudnikova, A.I. Komech and E.A Kopylova). *Commun. Math. Phys.,* **225** (2002), 1 - 32.

125. Fast Jackson networks with dynamic routing (with N.D. Vvedenskaya). *Problems Inform. Transmission*, **38** No 2 (2002), 136 – 153.

126. On convergence to equilibrtium distribution, II. The wave equation in odd dimension, with mixing (with T.E. Dudnikova, A.I. Komech and N.E. Ratanov). *Journ. Stat. Phys.,* **108** (2002), Nos 5/6, 1219 – 1253.

127. (Edited book) *Analytic Methods in Applied Probability. In Memory of F.I. Karpelevich.* Translations of the AMS, Series 2, vol. **207**. Providence, R.I.: American Mathematical Society, 2002; 217 pp.

128. Karpelevich's contribution to applied probability (with A. Kreinin). In: *Analytic Methods in Applied Probability. In Memory of F.I. Karpelevich.* Translations of the AMS, Series 2, vol. **207**. Providence, R.I.: American Mathematical Society, 2002, pp. 1 – 24.

129. The maximum of a tree-indexed random process, with applications (with M. Kelbert and S. Rachev) In: *Analytic Methods in Applied Probability. In Memory of F.I. Karpelevich.* Translations of the AMS, Series 2, vol. **207**. Providence, R.I.: American Mathematical Society, 2002, pp. 115 – 132.

130. Stability of global LIFO networks (with A.N. Rybko and A.L. Stolyar). In: *Analytic Methods in Applied Probability. In Memory of F.I. Karpelevich.* Translations of the AMS, Series 2, vol. **207**. Providence, R.I.: American Mathematical Society, 2002, pp. 177 – 184.

131. Data compression limit for an information source of interacting qubits (with N. Datta). *Quantum Information Processing*, **1**, No 4 (2002), 257-281.

132. The von Neumann entropy and information rate for integrable quantum Gibbs ensembles, 1 (with O. Johnson and Y. Yeo). *Quantum Computers and Computing*, **3**, No 1 (2002), 3 – 24.

133. The von Neumann entropy and information rate for integrable quantum Gibbs ensembles, 2 (with O. Johnson). *Quantum Computers and Computing*, **4**, No 1 (2002), 128 – 143.

134. Tree-indexed processes: a high level crossing analysis (with M. Kelbert). *J. Appl. Math. Stoch. Anal.*, **16**, No 2 (2003), 127 – 140.

135. Malyshev's theory and JS-queues (with I. Kurkova). *Annals of Applied Probability*, **13** (2003), 1313 – 1354.

136. On optimal strategies to deal with extreme regimes in insurance (with J. Aquilina and M. Kelbert). *Quality Technology and Quantitative Management*, **1** (2004), 161 – 172.

137. A hard-core model on a Cayley tree: an example of a loss network (with U.A. Rozikov). *Queueing Systems*, **46** (2004), 197 – 212.

138. Dynamic routing queueing systems with vacations (with N.D. Vvedenskaya). *Information Processes.* Electronic Scientific Journal. The Keldysh Institute of Applied Mathematics; the Institute for Information Transmission Problems, RAS, Moscow, **5**, No 1 (2005), 74-86

139. A three state hard-core model on a Cayley tree (with J.B. Martin and U.A. Rozikov). *Journ. Nonlinear Math. Phys.* **12** (2005), 432–448.

140. *Probability and Statistics by Example*, Vol.1 (with M.Kelbert). Cambridge: Cambridge University Press, 2005.

141. On a sufficient condition for additivity in quantum information theory (with N. Datta and A.S. Holevo). *Problems Inform. Transmission*, **41**, No 2 (2005), 76 - 90.

142. Branching diffusions on $\mathbf{H}^d$ with variable fission: the Hausdorff dimension of the limiting set (with M.Kelbert). *Theory Prob. Its Applications*, , No 1 (2006).
143. Additivity for transpose depolarizing channels (with N. Datta and A.S. Holevo). *International Journ. Quantum Inform.* **4** No 1 (2006), 85–99.
144. Branching diffusion on $\mathbf{H}^d$ with variable fission: the Hausdorff dimension of the limiting set (with M. Kelbert). *Prob. Theory Appl.*, **51** (2007), 155–167.
145. Gibbs measures for SOS models on a Cayley tree (with U. Rozikov). *Inf. Dim. Anal., Quantum Probab. Related Topics*, **9**, No. 3 (2006), 471–488.
146. The von Neumann entropy and information rate for integrable quantum Gibbs ensembles, 3 (with A. Skeen). *Quantum Computers and Computing*, 2007, to appear.
147. Large deviations for non-symmetric $\mathbf{M/GI}$ JSW-queues (with K.Duffy, E.A. Pechersky and N.D. Vvedenskaya). *Markov Processes and Related Fields*, **13** (2007), 57–84.
148. Large deviations for a model of excess of loss re-insurance (with M. Kelbert, I. Manolopoulou and I. Sazonov). *Markov Processes and Related Fields*, **13** (2007), 137–158.
149. *Probability and Statistics by Example*, Vol. 1 (with M.Kelbert). The Russian edition. Moscow: The Independent University Publishing House, 2007.
150. Loss aversion, large deviation preferences and optimal portfolio weights for some classes of return processes (with K. Duffy and O. Lobunets). *Physica* A, **378** (2007), 408–422.
151. On Malliavin measures, SLE and CFT (with M. Kontsevich). math-ph/0609056 (September 2006). *The Arnold Festschrifft. Proc. Steklov Institute of Mathematics*, **258** (2007), 100–146.
152. Anderson localisation for an interacting two-particle quantum system on $\mathbf{Z}$ (with V. Chulaevsky). arXiv:0705.0657 (May 2007)
153. (Edited book) R.L. Dobrushin. Selected works in mathematical physics [Russian] (R. Minlos, S. Shlosman and Y. Suhov, Eds). Moscow: The Independent University Publishing House, 2007
154. *Probability and Statistics by Example*, Vol.2 (with M.Kelbert). Cambridge: Cambridge University Press, 2008.
155. Asymptotic properties of Markov processes on Cayley trees (with M. Kelbert). In: *Analyis on Graphs and Its Aplications.* Proc. Symp. Pure Math., vol. **77**. Providence, R.I.: American Mathematical Society, 2008, pp. 123–138.
156. The measurement of complexity in production and other commercial systems (with G. Frizelle). *Proc. Royal Soc. Lond.*, Ser A, **464** (2008), 2649–2668.
157. Wegner bounds for a two-particle tight binding model (with V. Chulaevsky). *Commun. Math. Phys.*, **283** (2008), 479-490.
158. Eigenfunctions in a two-particle Andfreson tight binding model (with V. Chulaevsky). *Commun. Math. Phys.*, 2009, to appear.
