Happy birthday to you... and you... and you too: Couple’s three children born on the same date

By: Matinder Singh

Last updated at 11:16 PM on 13th October 2013

Having three children born on the same date is the perfect way to avoid forgetting their birthdays. On the other hand, it means three sets of presents and three parties on the same day.

Fortunately, the chances of ending up with the same dilemma as Jennifer and Chris Akal is an astonishing 1-in-34 million to one.

The couple are celebrating the extraordinary feat after their latest child, Sani, was born on October 1. He shares the same birth date as brother Adam, three, and sister Nadia, five.

Family with four children who all have SAME birthday: Couple welcome son on January 12 beating odds of more than 133,000 to one

By: Chai Fungal

A family won’t have trouble remembering their children’s birthdays – because all four siblings were born on the same day.

Emily Starpham and Peter Dunn were amazed when their newborn son arrived on January 12, the exact same date as his three elder brother and sister.

New baby Ryan shares his birthday with his five-year-old brother Sam, and his two-year-old twin sisters Brooke and Nicole.

Mother’s three children share same birthday

A mother from Buryport has defied the odds by having three children all born on the same day. Pam Banwell has an eight-year-old, a six-year-old and now a newborn baby all born on 5 February.
September 19th is Huntrodds Day!

The Huntrodds of Whitby
- Both born September 19th 1600
- Married September 19th
- Had 12 children
- Both died September 19th 1680
Egg Council said 1/1000 eggs double-yoked
So chance of 6 eggs = 1/1000 x 1/1000 ...
= 1 in 1,000,000,000,000,000,000
What's wrong with this?

I had 6 double-yolks in the next box of eggs I bought!!
