Advanced Financial Models (M24)

M.R. Tehranchi

This course is an introduction to financial mathematics, with a focus on the pricing and hedging of contingent claims. It complements the material in Advanced Probability and Stochastic Calculus & Applications.

**Pre-requisites**

Familiarity with measure-theoretic probability will be assumed.

**Literature**

**Additional support**

Four examples sheets will be provided and four associated examples classes will be given. There will be a one-hour revision class in the Easter Term.
